

APEX — Stress Test Users & Evaluation Data Guide

This document lists the **49 test users** (all using @franklyn.dev domains) and describes the **10 pre-seeded Summary Groups** and **40 realistic performance evaluations** generated by the stress test seeding script (scripts/seed-stress.ts).

To run or reset the stress test data in your Supabase database:

```
# Seed stress test data
npm run db:seed-stress

# Reset (delete previous stress test evals & summary groups) and re-seed
npm run db:seed-stress:reset
```

1. Test User Credentials & Global Password

All test users in the system have been **explicitly verified and populated** in your live Supabase cloud database. They share the exact same global password:

- **Global Password:** NavyEval!2026

(Note: Every single @franklyn.dev email in your Supabase project is confirmed and set to this password!)

2. Pre-Seeded Summary Groups & Assigned Members

To enable realistic testing of **Block 50a Summary Group Averages** and **Table 1-2 Forced Distribution Quotas** (20% EP cap / 60% EP+MP cap), the seed script automatically creates **10 Summary Groups** (one for each rating/paygrade across your 3 commands).

Every Summary Group is pre-populated with exactly **4 competing Sailors** representing diverse trait averages and routing stages:

4. How to Stress Test Summary Groups & Forced Distribution

1. Test Forced Distribution Quotas:

- Log in as co.enterprise@franklyn.dev (Reporting Senior) using password NavyEval!2026.
- Navigate to **Summary Groups** in the top navigation bar.
- Click into **IT1 Regular EVAL Summary Group (USS ENTERPRISE)**.
- You will immediately see all **4 IT1 evaluations** attached to this group:
 - 1 Early Promote (EP) — 25% of group (compliant with EP quota)
 - 1 Must Promote (MP) — 50% EP+MP (compliant with 60% combined quota)
 - 2 Promotables (P)
- Observe the real-time calculation of **Block 50a Summary Group Average** pooled across all 4 peers!

2. Test Multi-Hop Custody Routing:

- Log in as rater.it@franklyn.dev.
- Open one of the evaluations currently in Rater review (e.g., CROSS, BENJAMIN B (STRESS #3)).

- Review Block 43 narrative bullets, check Block 41 career recommendations (capped at 2), and click **Approve & Route Forward** to send custody to the Senior Rater (senior.rater1@franklyn.dev).

3. Test CO Digital Signature & Locking:

- Log in as co.enterprise@franklyn.dev.
- Open an evaluation waiting in Reporting Senior review (e.g., REYNOLDS, JOHN D (STRESS #1)).
- Scroll down to Block 50 (Reporting Senior Signature), use the interactive HTML5 canvas pad to sign, and complete sign-off.
- Verify that the evaluation status transitions to completed, signature_locked becomes true, and the form becomes strictly read-only!
